

# Monoammonium phosphate

Formula:  $\text{NH}_4\text{H}_2\text{PO}_4$

---

Origin: **J. T. Baker**

CAS: **7722-76-1**

---

Acquisition mode: **transmission**

Monochromator: **Si(111)**

The monochromator energy was calibrated against the “white line” of tricalcium phosphate ( $\text{Ca}_3(\text{PO}_4)_2$ ) at **2152.7 eV**.

---

Contact Person: **Christian Vogel**
