

S⁶⁺

Rhombochase

Mineralogical Group: **sulfate, VI-29-1**

S environment: **tetrahedral coordinance**

Crystal system: **orthorhombic bipyramidal, Pnma**

Origin: **Puis Alfredo, Rio Tinto, Spain**

Chemical composition:

Preparation of sample: **thin layer of powder**

Crystallinity state:

Acquisition mode: **fluorescence (photodiode)**

Date of acquisition: **18/05/2006**

X-ray absorption data (normalized): [rhomboclase_fluo_norm.dat](#)

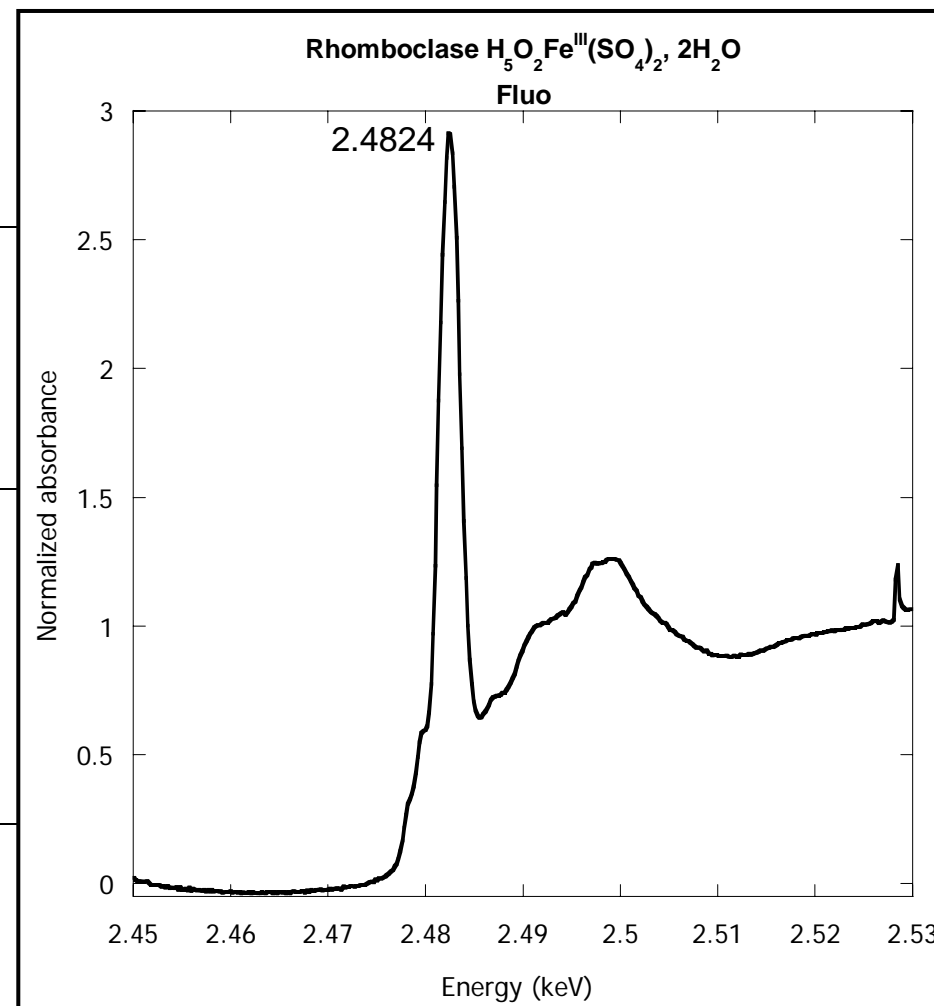

Calibration with CaSO_4

Max of the “white-line” (s → p electronic transition) at **2.4824 KeV**

Contact person: **Koen Janssens**
